WORK EXPERIENCE

Research Intern / [DisneyResearch](#) | [Studios](#)

A lab advancing visual computing, AI, and filmmaking technologies.

Zürich, Switzerland | Feb 2025 - Aug 2025

- Owned end-to-end design and development of an interactive web application (Vue.js, TypeScript) from user research through production for The Walt Disney Studios, conducting UI/UX testing and iterating on data visualization components based on user feedback to increase engagement by 30%.
- Designed and built an AI-powered data platform using Python, LLMs, and RAG systems to extract insights from narrative text, creating intuitive node graph visualizations (Cytoscape.js) that enabled non-technical users to explore complex relationships through dynamic filtering.

Development Intern / [Sensoryx](#)

A Swiss startup specializing in motion tracking for VR/AR.

Zürich, Switzerland | Aug 2024 - Dec 2024

- Developed 3 AR/VR prototypes using Unity, XR Interaction Toolkit, and Oculus XR Plugin, implementing intuitive 3D object manipulation, spatial painting, and hand tracking capabilities for motion tracking integration.
- Optimized VR stylus interaction systems through engineering collaboration, enhancing responsiveness and precision to deliver a significantly improved user experience for complex 3D interactions.

Product Designer and Developer / [insdash](#)

Independent web development and interaction design practice.

Remote, Switzerland, Taiwan | Jan 2022 - July 2024

- Collaborated with 6+ clients across hospitality, education, and e-commerce to design and build responsive web applications tailored to their user needs, using modern JavaScript and CSS frameworks to deliver scalable, accessible solutions.
- Designed and developed interactive prototypes, reusable UI components, and motion graphics to streamline product development and enhance user interaction patterns.
- Client highlight:** Created 3D product animations for Thömus AG (Swiss bike manufacturer) from concept to completion, achieving 10k views (5x above average) and driving customer traffic to product pages.

PREVIOUS EXPERIENCE

Product Design Manager / [Yun.official](#)

Fashion startup transitioning from handcrafted to digital e-commerce.

Taipei, Taiwan | Mar 2021 - Aug 2021

- Optimized e-commerce UX to secure manufacturing partnerships and drive a 35% increase in orders in the first post-launch season.

Research and Teaching Assistant / [Tamkang University](#)

New Taipei City, Taiwan | Sep 2017 - Sep 2018

- Developed and led implementation of computational design and robotic fabrication workflows (Grasshopper 3D, robotic arm programming), training and mentoring 50+ students across 3 hands-on workshops while delivering on-site robotic fabrication systems for a large-scale architectural project.

SKILLS & TOOLS

Frontend Development

JavaScript, TypeScript, Vue.js, HTML5/CSS3, Tailwind CSS, Bootstrap, jQuery, Cytoscape.js, Interactive Data Visualization

Backend & Tools

Python, C#, Node.js, ChromaDB, SQL FastAPI, RAG Systems, Large Language Models (LLMs), Docker, Docker Compose, Git/GitHub/GitLab

UI/UX & Prototyping

Figma, Miro, Adobe Creative Suite

AR/VR & 3D Development

Unity 3D, XR Interaction Toolkit, Oculus XR Plugin, Blender 3D, Cinema 4D, Rhinoceros 3D & Grasshopper

Digital & Robotic Fabrication

3D-Printing, Laser Cutting, CNC Milling, Digital Cutter, Plasma Cutting, Vacuum Forming, KUKA, ABB, UR10/UR5

Languages

English (Fluent)
Chinese (Native)
German (B1-B2)

EDUCATION

ETH Zürich

Switzerland, Sep 2018 - Sep 2019

Master of Advanced Studies
Architecture and Digital Fabrication
GPA 5.25 / 6

Tamkang University

Taiwan, Sep 2012 - Sep 2017

Bachelor of Architecture
GPA 3.430 / 4

CERTIFICATE

Google UX Design Certificate

Coursera, Issued 2021
